GUESS THE BRITISH BIRD

ROBIN FACTS

The robin might seem cute, but it is actually a highly territorial bird and will aggressively defend its domain against others. Both male and female robins hold territories, as a pair in summer and as individuals in winter. They will defend these with surprising ferocity, driving off intruders and making their presence known by singing loudly from conspicuous perches.

These much-loved birds are on the rise as the UK robin population continues to increase. They have an average lifespan of 2 years. Males and females look identical, sporting a brown back, white belly and red breast, face and cheeks. In contrast, juveniles are speckled gold and brown, only developing the distinctive red plumage in adulthood.

Robin, Blackbird, Chaffinch, Blue Tit, Lesser Spotted Woodpecker, Bullfinch

DON'T FORGET IT'S SHERRY TIME AT 3.00 O'CLOCK EVERY DAY!
